PROFESSIONAL EXPERIENCE

Associate System Engineer

IBM

Dec 2025 – Present

Bangalore, India

- Executed functional testing for **SAP SuccessFactors** cloud integrations, identifying and resolving 30+ critical defects that prevented production rollbacks and improved release stability by 15%.
- Collaborated with cross-functional teams in **Agile** sprints via **Jira**, streamlining the defect lifecycle to reduce average bug resolution time by 20% across 4 major deployment cycles.
- Developed 45+ automated test scripts using **Java Selenium**, cutting regression testing time by 30% and decreasing manual testing effort, while supporting concurrent Playwright and Cypress initiatives.

SOFTWARE ENGINEERING PROJECTS

Database Backup CLI Infrastructure

GitHub

TypeScript, Python, MySQL, Linux

- Engineered a production-grade infrastructure automation tool (CLI) for asynchronous database backups, reducing manual database deployment and migration time by 80%.
- Architected a **stream-based processing** system to reliably handle up to 50GB data migrations, maintaining a memory footprint under 150MB and improving operational stability.
- Designed automated error handling and system recovery protocols, achieving a 99.9% backup success rate across distributed environments.

Project Management Engine — Scalable System

Live API | GitHub

Express, MongoDB, Redis, Docker

- Designed and deployed a scalable backend architecture supporting 25+ REST endpoints with granular Role-Based Access Control, optimizing core API response times to under 120ms.
- Integrated asynchronous notification pipelines using **BullMQ** and **Redis**, decreasing cache latency by 15ms and improving background task throughput by 40%.

Distributed Image Processing Backend

GitHub

Bun, Node.js, Express, MongoDB

- Architected a scalable image processing and delivery service featuring dynamic file transformations, reducing average image delivery payloads by 40% while maintaining visual quality.
- Engineered robust database schemas using **Mongoose** to efficiently manage complex image metadata, improving query response times by 25% for high-throughput read operations.

EDUCATION

Bachelor of Engineering in Computer Science

Visvesvaraya Technological University | CGPA: 7.28/10.0

Sept 2021 – June 2025

Belgavi, India

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, Python, Java, C++, SQL
- Backend & Systems:** Node.js, Express, Bun, Redis, BullMQ, MongoDB, MySQL, Stream Processing
- DevOps & Architecture:** Distributed Computing, API Design, Docker, Linux, Bash Scripting, CI/CD, Git

ACHIEVEMENTS

- LeetCode:** Solved 281+ problems (Global Rank Top 13%); highly proficient in core algorithms and data structures.
- Hackathons:** 3x Finalist (1 Regional, 2 University-level); recognized for rapid prototyping and scalable backend design.
